AUTHOR	Byrd, Mark A.
TITLE	Degrees Granted and Program Production by Arkansas Institutions of Higher Education, 1983-84. Report 84-3.
INSTITUTION	Arkansas State Dept. of Higher Education, Little Rock.
PUB DATE	Mar 85
NOTE	160p.; Appendices printed on colored paper and contain small print.
AVAILABLE FROM	Arkansas Department of Higher Education, 1301 West Seventh Street, Little Rock, AR 72201-2993.
PUB TYPE	Statistical Data (110) -- Reports - Descriptive (141)
EDRS PRICE	MF01/PC07 Plus Postage.
DESCRIPTORS	Associate Degrees; Bachelors Degrees; *College Graduates; *Degrees (Academic); Doctoral Degrees; *Educational Certificates; Higher Education; *Majors (Students); Masters Degrees; Private Colleges; Public Colleges; State Colleges; Two Year Colleges
IDENTIFIERS	*Arkansas

ABSTRACT

Data on degrees conferred in 1983-1984 by the 32 higher education institutions in Arkansas are presented, along with a narrative description of trends. The data include second-summer, fall, spring, and first-summer terms. Total degrees granted in 1983-1984 fell by 2% from the previous year. At state-supported institutions, degrees granted as a whole dropped 3.7%, while the private institutions showed a considerable increase of 8.4%. The number of baccalaureate degrees conferred by Arkansas institutions rose by 2%; the associate-degree count declined by slightly over 12%, and the number of masters and first-professional degrees continued to decline. The number of educational certificates and doctoral degrees remained relatively steady. Tables include an institutional listing of certificates and degrees conferred at the associate, bachelors, masters, and doctoral levels; degrees granted by level and discipline; degrees by level and sector; and degrees for the specific state and private institutions. The tables also provide a cross reference for the four groups of institutions (state four-year, state two-year, private four-year, and private two-year). Included are trend data on degrees for 1979-1980 through 1983-1984. (SW)

FOREWORD

This report is part of a series of analytical reports published annually by the Arkansas Department of Higher Education (ADHE) based on data collected through the National Center for Education Statistics (NCES) surveys.

The efforts, cooperation and assistance of the institutional personnel who complete the surveys is greatly appreciated. Without the cooperation of those individuals the series of analytical reports would be inconceivable. We are gratified at the high degree of participation by the independent institutions which makes AHEIS one of the few state-wide information systems to cover both private and public institutions of higher learning.

This report was composed by Mark A. Byrd with editorial assistance from John Spraggins. The ADHE production division, supervised by Mary Griebel, provided assistance in typing various tables and running the final publication. The ADHE staff invites suggestions on how we might improve this report in future editions.

Table		Page
B-1.	Degrees Granted and Other Formal Awards Conferred Between July 1, 1983 and June 30, 1984 for Two-Year State Institutions	109
B-2.	Degrees Granted and Other Formal Awards Conferred Between July 1, 1983 and June 30, 1984 for Four-Year State Institutions	114
B-3.	Degrees Granted and Other Formal Awards Conferred Between July 1, 1983 and June 30, 1984 for Two-Year Independent Institutions	131
B-4.	Degrees Granted and Other Formal Awards Conferred Between July 1, 1983 and June 30, 1984 for Four-Year Independent Institutions	132

EXECUTIVE SUMMARY

Total degrees granted in 1983-84 fell by 2% from the preceding year, which provided an apex to a steady five-year increase in degrees conferred at the state and independent institutions. At state-supported institutions, degrees granted as a whole dropped by 3.7% while the independent institutions showed a considerable increase of 8.4% (see Table 1).

The number of certificates remained relatively stable, while the associate-degree count declined by a little over 12%. The state and independent institutions showed respective declines of 229 and 23 associate degrees conferred.

Baccalaureate degrees conferred by Arkansas institutions rose in FY 1983-84 by 2%. Although the bachelor's degree production in the state was up by 113, the state four-year institutions' production declined by almost 1%, while the independent institutions production rose by 14% -- a new high -- over FY 1982-83.

Degrees conferred at the specialist, intermediate and doctorate levels continued at a steady state, while degrees at the masters and first-professional levels continued to decline. The decline in master's degrees conferred took place at both the state and independent institutions; the independents showed however, the sharpest reduction with 25% fewer degrees being awarded over last year -- 111 in 1982-83 to 83 in 1983-84. Ouachita Baptist University (OBU) granted 32 fewer degrees, which explains the decrease in the independents, while Harding University (HU) increased production by 4 degrees over last year.

DEGREES GRANTED BY ARKANSAS INSTITUTIONS OF HIGHER EDUCATION, 1983-84

The Degrees Granted report is a descriptive analysis of the types and number of degrees conferred annually by the 32 higher education institutions in the State of Arkansas. This annual report is in its second year of publication under the Classification of Instructional Programs (CIP) coding system, developed under a joint effort of the National Center for Higher Education Management Systems (NCHEMS) and the National Center for Education Statistics (NCES). Data released in prior years were reported under the Higher Education General Information Survey (HEGIS) Taxonomy system. Consequently, the data in years preceding 1982-83 will not be completely comparable to subsequent years. Because of this discrepancy, any comparisons made over the past years are undertaken with caution.

Data presented in this report were collected through the NCES surveys. The degrees granted report for fiscal year 1983 to 1984 includes the second-summer, fall, spring, and first-summer terms.

Appendix A provides a comprehensive listing of degrees granted by all Arkansas higher education institutions by type of degree. Additionally, the preceding year (1982-83) is listed to provide a quick comparison and to commence a five-year listing under the CIP code system. Appendix B is a compilation of all postsecondary degrees granted by type of institution in Arkansas during the 1983-84 academic year. These tables provide a cross reference for the four groups of institutions (i.e. state four-year, state two-year, independent four-year, independent two-year). Appendix C lists the primary terms used in this report. Finally, a list of institutions and corresponding abbreviations as used in all reports published by the Arkansas Department of Higher Education (ADHE) is provided in Appendix D.

1983-84 DEGREES GRANTED BY SUBJECT FIELD

Tables 2 and 3 display degrees granted at Arkansas state and independent colleges and universities by type of degree and by subject field for 1983-84. State institutions granted 1,771 certificates and associate degrees (Table 2). Of those, 35% were health professions, 32.5% were in liberal/general studies and 12% were in business related fields. These three areas accounted for almost 80% (1,414) of the certificates and associate degrees conferred by all state institutions in 1983-84. For the independent institutions, liberal/general studies accounted for 66% of the certificates and associate degrees, followed by business with 19% (see Table 3).

Education is no longer the dominate baccalaureate degree. Business was the most frequently granted degree in the state and independent universities. State colleges and universities granted 1,441 business degrees, with accounting replacing business administration as the most popular degree in the business field (415 and 270 respectively). Within the education field, elementary education remained the favorite area of concentration, showing a slight increase of 532 degrees over last year's 507.

Tables 4 and 5 provide a historical view of the number of bachelor's degrees granted at the state and independent institutions, respectively. The coding system for academic degrees changed in FY 1982-83; for this reason subject fields were combined when it was deemed necessary to provide continuity across years. The independent and state universities were separated because of the differences in institutional missions.

Table 4 provides the number of degrees granted by discipline for state four-year institutions (not inclusive of the University of Arkansas for Medical Sciences) for the period 1976-77 through 1983-84. Rankings are provided at the far left and far right of the table to represent the relative frequency with which Arkansas public universities granted particular degrees. In 1976-77, education was by far the dominate degree granted, representing almost 28% of the total degrees granted by the state institutions, while business was second,

accounting for nearly 18% of degrees granted, followed by social science, health professions and life science. By the end of the eighth year some dramatic shifts had occured. Education had dropped 7.8% while business replaced education as the number-one degree, increasing 57.4% from 1976-77. Engineering degrees increased by 300% and replaced social science in the number-three spot. The most dramatic change in the number of degrees granted came in the area of computer science which had a rate of increase of 12.05 or 1,205%. Computer science ranked eighteenth in 1976-77; in 1983-84, it ranked fifth. Health professions and life science plummeted from their 4th and 5th rankings in 1976-77 to 7th and 9th respectively in 1983-84.

Table 5 provides the number of degrees granted by discipline for independent four-year institutions for the period 1977-78 through 1983-84. Once again, rankings are provided at the far left and far right of the table. The top two spots in the ranking are the same as those for the state four-year institutions. Nevertheless, the change in the number of degrees granted in both education and business is not as dramatic as is the case for the state institutions. In 1983-84, business replaced education as the number one degree granted by the independents. Although education plummeted in 1983-84 both in numbers and as a percent of total degrees granted over those granted in 1982-83, the figures show education continuing a decline, in terms of raw numbers, that began in 1981-82. From 1979-80 to 1982-83, business and education ran a very tight race. In 1983-84, however, business took a commanding lead. Computer science showed a dramatic rise from 1977-78 by increasing in numbers by 65 and moving into the number-seven spot.

On the masters level, education remained the dominate field at both the state and independent institutions. The number of Master of Education degrees declined from the preceding year by a combined state and independent total of 97. At the same time the number of business degrees conferred rose by 12% from last year's 188.

Other types of graduate degrees included 14 intermediate degrees, of which 13 were in home economics and 1 in letters. Arkansas State University at Jonesboro (ASUJ) and the University of Arkansas at Fayetteville (UAF) granted a combined total of 52 specialist degrees in education. UAF conferred 8 more

doctoral degrees than last year's 119, while the University of Arkansas for Medical Sciences (UAMS) conferred 7 fewer doctoral degrees, resulting in a net increase of 1 degree granted over last year's 128.

FIVE-YEAR DEGREES GRANTED TRENDS BY TYPE OF INSTITUTION

Undergraduate Degree Production at State Institutions

One might reasonably expect a direct correlation between first-year enrollment and the number of degrees or certificates granted subsequently upon completion. For the state two-year institutions this hypothesis, in part, seems true. Enrollment of full-time first-time entering students one to two years prior to the projected graduation date was up (see Table 6). Consistent with the hypothesis, certificate production was up over last year (see Table 7), but, on the other hand, associate degrees dropped by 14.8% (see Table 8). Although this decline in associate degrees does not follow the stated hypothesis, Table 9 might offer some exegesis. Westark Community College (WCC) conferred in 1983-84 66.8% fewer degrees in liberal/general studies; this decrease occured because of the anomalous figures for the preceding year. In FY 1982-83 WCC followed up on the students who had not completed the process of graduating from the associate degree program in years passed and encouraging these students to file for graduation. The result of such a pursuit by WCC was a larger-than-normal number of associate degrees conferred in 1982-83.

The state four-year institutions' total production fell by 1% in 1983-84 (see Table 10), yet the enrollment of full-time first-time entering students was up in 1980. Additionally, Table 10 shows that only three institutions, UAF, UAPB and UCA, had decreases in bachelor degree production. These three universities typically account, however, for around 47% of the baccalaureate degrees conferred by Arkansas' public institutions. The drop in production at these institutions was not expected because all three were still increasing in their full-time first-time enrollment at that time.

Undergraduate Degree Production at Independent Institutions

Independent institutions produce only a small portion of the total certificate degrees granted -- approximately 2%; they were down by 3, however, in the number of certificates awarded. At the associate-degree level the independent four-year institutions were up by 3 degrees while the two-year colleges were down by 26 (refer to Tables 7 and 8).

In fiscal year 1983-84, the independent four-year institutions show the highest bachelor's degree production since 1978-79 -- see Table 10. This is understandable because fall 1980 enrollment at the private institutions was the highest since fall 1974. Arkansas Baptist College (ABC) was the only institution that declined in degree production. Ouachita Baptist University (OBU) had the largest increase, with 37 more of degrees granted than in the preceding academic year.

Graduate Degree Production at State and Independent Institutions

Table 11 presents figures on the number of masters degrees conferred by institution. Both the state and independent institutions were down in master's degree production. Only Arkansas State University at Jonesboro (ASUJ), Southern Arkansas University at Magnolia (SAUM) and University of Arkansas at Little Rock (UALR) showed increases. The largest decline numerically came from UAF -- 38 fewer master's degrees granted -- with UCA showing the largest percentage decrease, -14.4%.

TABLE 11. SUMMARY OF MASTERS DEGREES CONFERRED BY ARKANSAS COLLEGES AND UNIVERSITIES, 1979-80 THROUGH 1983-84

The number of specialist degrees conferred (UAMS and UAF figures include intermediate degrees) as displayed in Table 12 has continued to decline over the past 4 years, with UAF increasing and ASUJ and UAMS causing the decline.

TABLE 12. SUMMARY OF SPECIALIST DEGREES CONFERRED BY ARKANSAS COLLEGES AND UNIVERSITIES, 1979-80 THROUGH 1983-84

TOTAL	60	73	69	68	66

* Intermediate Degrees Granted Were Included With Specialist Degrees

Table 13 summarizes the figures on doctoral degrees conferred by UAF and UAMS from 1979-80 through 1983-84. Doctoral degree production dropped at UAMS from 9 to 2 degrees in 1983-84. UAF showed a 6.7% increase in the number of degrees granted. The major contributory factor to this increase was the increase in the number of degrees granted in engineering -- up from 2 in 1982-83 to 12 in 1983-84 (refer to Table A-40).

TOTAL	108	105	126	128	129

Professional degrees are offered at three of the universities in the state. UAF and UALR offer law degrees while UAMS offer a degree in medicine. Table 14 shows the decline in the number of first professional degrees conferred by the three institutions. The major decrease in the number of degrees granted occurred at the UAF law school. This decline resulted from a policy decision by the university administrators to adapt to the changing demand for attorneys.

APPENDIX C

APPENDIX C: GLOSSARY

STUDENT LEVEL - Refers to the proportion of total requirements a student has obtained, as of the census date, toward the completion of the degree/diploma or certificate program in which the student is enrolled. The following mutually exclusive student level categories will be used:

UNDERGRADUATE:

1. LOWER DIVISION - A student who a) is enrolled in a program(s) of study, or activity(ies) which leads to an associate degree (including three-year associate degree programs) or a bachelors degree and has earned less than 60 semester credit hours; or b) is enrolled in an undergraduate occupational or vocational program(s) of three or fewer years' duration which results in formal recognition below the baccalaureate degree. (Typically, this individual would be classified as a freshman or a sophomore.) The following subdivisions may also be used:

   a. FRESHMAN - A lower division student who has earned fewer than 30 semester credit hours.

   b. SOPHOMORE - A lower division student who has earned at least 30 but less than 60 semester credit hours. (In institutions offering two-year or less programs, students who have earned 30 or more semester credit hours are classified as sophomores.)

2. UPPER DIVISION - A student who a) is not in an associate degree or occupational/vocational program(s), b) is enrolled in a bachelors degree program, and c) has earned 60 semester credit hours. (Typically, this individual is classified as a junior or a senior.) This category includes a student in years three, four, or five of a five-year bachelors degree program. The following subdivisions may also be used:

   a. JUNIOR - A student who has earned at least 60 but less than 90 semester credit hours.

   b. SENIOR - A student who has earned 90 or more semester credit hours.

3. UNCLASSIFIED PRE-BACCALAUREATE - A student who cannot be classified into one of the categories above because he or she is not enrolled in a program of study leading to a degree/diploma or certificate, even though taking courses with regular students. This category does <u>not</u> include students who have been admitted to pursue a degree but have not yet declared a major. This category <u>does</u> include students who have received an earned <u>baccalaureate</u> degree, have <u>not</u> been accepted by the institution for graduate-level study, <u>and</u> are taking undergraduate-level courses, such as teachers taking courses for certification.

FIRST PROFESSIONAL - A student who is enrolled in a first professional degree program. (See DEGREE/DIPLOMA/CERTIFICATE for an inclusive list of FIRST PROFESSIONAL DEGREE PROGRAMS.) A student enrolled in an undergraduate pre-professional curriculum or a student in one of the first two years corresponding to the undergraduate freshman or sophomore year of an integrated graduate professional degree program(s) should be classified as a lower division and not as a first professional student.

GRADUATE:

1. MASTERS - A student who has received an earned baccalaureate degree, has been accepted for graduate-level study, and:

   a. Who is enrolled in a masters degree program, or

   b. Who is enrolled in a doctoral program but has earned less than 30 semester credit hours in graduate course work.

2. SPECIALIST - A student who has received an earned baccalaureate degree and is enrolled in a specialist degree program.

3. DOCTORAL - A student who has received a masters or specialist degree, or has earned at least 30 semester credit hours in graduate course work, and who is enrolled in a doctoral degree program.

4. UNCLASSIFIED POST-BACCALAUREATE - A student who has been awarded an earned baccalaureate degree and who is eligible to enroll in credit courses at the graduate or other post-baccalaureate level but who cannot be classified into one of the categories above because he or she has not been accepted by the institution for graduate-level study.

TYPES OF DEGREES - Eight major types of earned degrees are awarded annually by Arkansas colleges and universities. For the purposes of this report, the following mutually exclusive degree categories are considered:

1. POSTSECONDARY CERTIFICATE OR DIPLOMA - The majority of certificate are awarded by the two-year state-supported and independent schools. Typically designed for completion in less than two academic years, most certificate programs are offered in specialized areas including business and commerce, data processing, health or public services, and mechanical or natural science technologies.

2. ASSOCIATE DEGREE - An associate degree is granted following completion of an academic program of at least two years but less than the four years required by traditional baccalaureate programs. These degrees may be either terminal or preparatory for further postsecondary study.

3. BACCALAUREATE DEGREE - Baccalaureate degrees are earned after completion of a specified academic program of a minimum of four years.

4. MASTERS DEGREE - In liberal arts and sciences, masters degrees are customarily awarded upon completion of one to two years of academic work at the post-baccalaureate level. In professional fields such as law and medicine, the master's degree is an advanced degree usually earned after completion of a first professional degree.

5. SPECIALIST DEGREE OR CERTIFICATE - Specialist degrees, commonly in the field of education, are a type of intermediate degree earned between completion of the masters and doctoral degree.

6. INTERMEDIATE DEGREE - Other intermediate degrees are awarded as recognition for a program intermediate between masters and doctoral degrees. In essence, the intermediate degree is a doctoral degree without a dissertation.

7. DOCTORAL DEGREE - Reported independently of first professional degrees, doctorals are regarded as the terminal degree in a profession or academic discipline. An average of three years of graduate work and publication of a formal dissertation are common requirements for this type of degree.

8. FIRST PROFESSIONAL DEGREE - These degrees require a minimum of six years of postsecondary academic study, including two years of college work completed prior to admission to the program. First professional degrees are awarded in three fields in the State of Arkansas (i.e. law, medicine and pharmacy) and must be completed before establishing a practice in these professions. It should be noted that the University of Arkansas Medical Sciences Campus (UAMS) also offers both a bachelors program in pharmacy and a D.Phar. that qualify graduates for licensure, but only the D.Phar. is considered a first professional degree.
